Session Report

IEC ACTIVITIES FOR SCHOOLS

Mode: Online, Duration: 45 mins + 15mins

Help the world change by setting the example: Reduce, Reuse, Recycle

Objectives

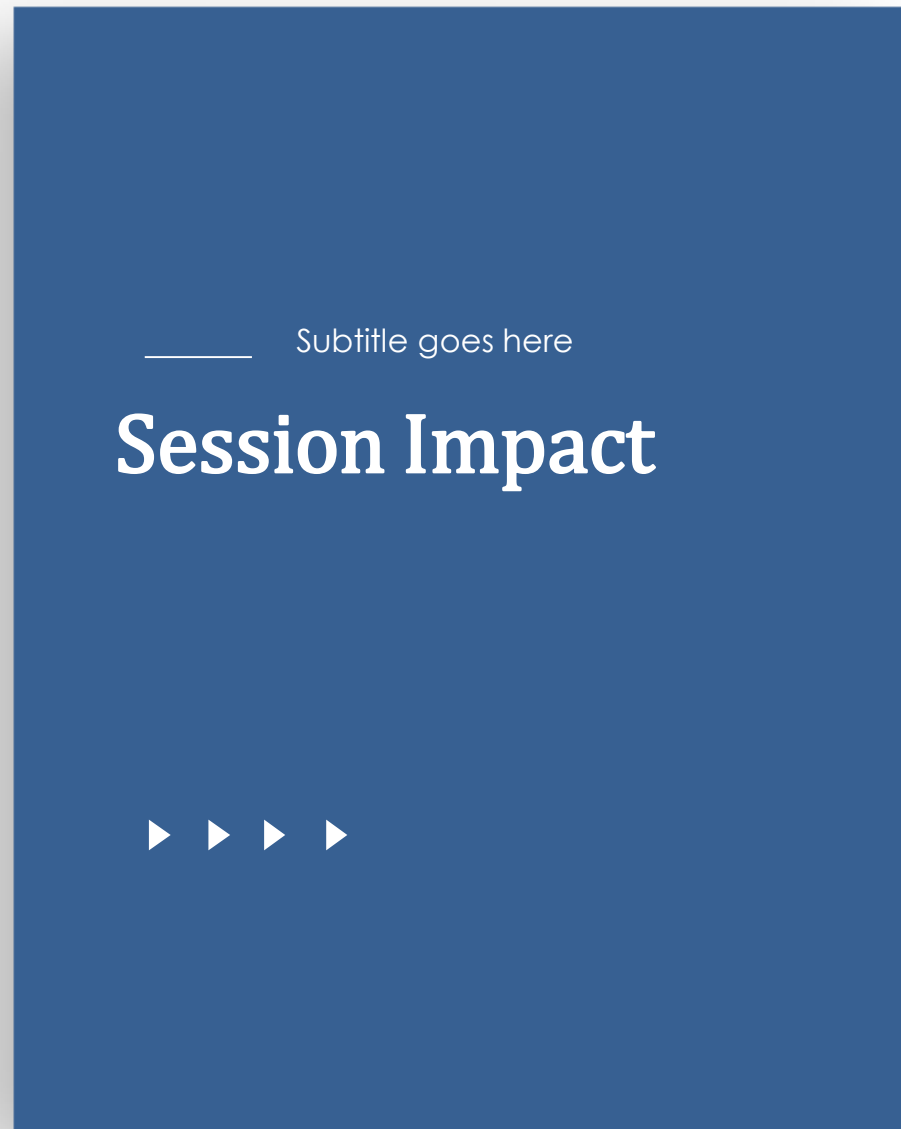

- Raising awareness regarding impact of E-waste pollution.
- Educating the stakeholder regarding individual contribution towards sustainability.
- Inculcating the culture of waste segregation and importance of 3Rs of waste management
- Raising awareness about the role of young generation to change the status quo in terms of waste management in the households.
Especially E- Waste.

Summery

The session started with how anthropogenic activities have severely impacted the resources availability on the planet and how E-waste has reached the most pristine places on the planet which were thought to be E-waste free. The impact of E-waste pollution has wider consequences than people can imagine. The attendees were shown a few pictures of littered beaches and mountains to show how human behavior can negatively impact an entire ecosystem. The students were also told how E-waste in itself is not a problem, but the way we manage it is a very big challenge.

The students were also shown a way forward with small actions they can take in their individual lifestyles so as to stop the waste from ending up in the environment. From being conscious to making smart choices as a consumer and recycle, students were informed about the small actions they can take to complete the loop and stop the waste from going into landfills and water bodies.

They were also informed about the laws pertaining to waste management and how each household is responsible for waste segregation. We also emphasized on the role of student participation in community engagement and how students can take the initiative of taking the campaign forward.

**Location: Hyderabad
Telangana**

**School- Fountainhead
Global School**

**60 Students
participated**

**4 Teachers Joined the
session**

The student took the **pledge** that they will be conscious of e-waste segregation and conduct a **collection drive** on their school campus.

Question & Answer

What is E-waste

What are the valuebale we can find in electronic goods

Questions & Queries pertaining to Recycling of E-waste

Regarding working of the Laws of solid waste management

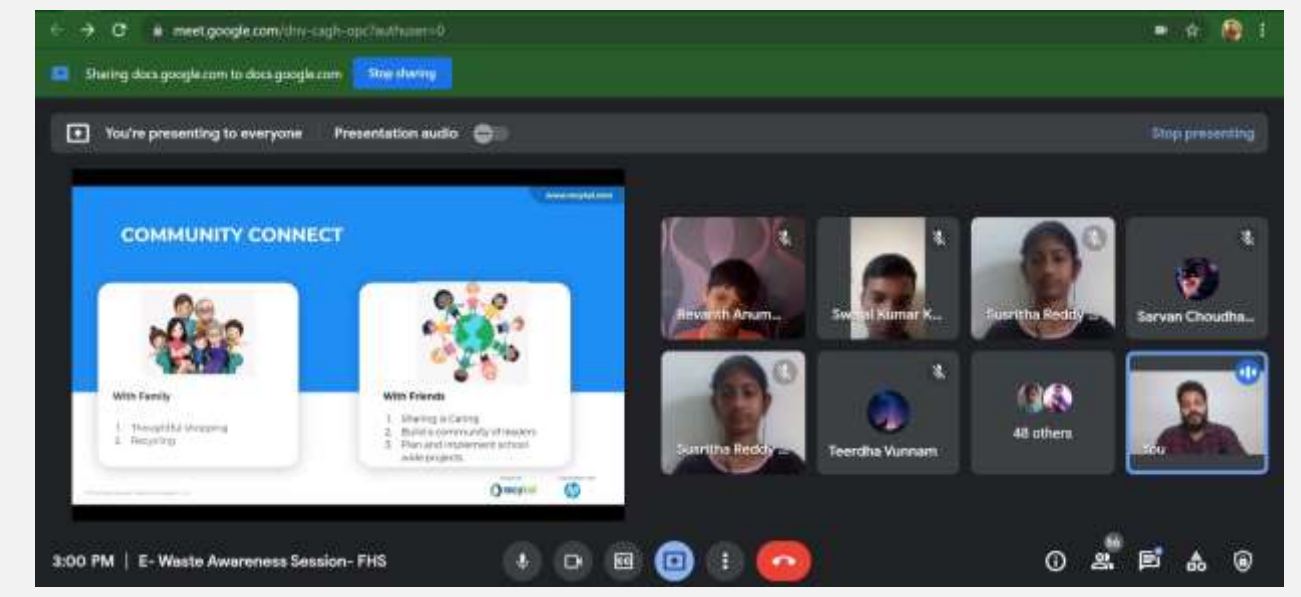

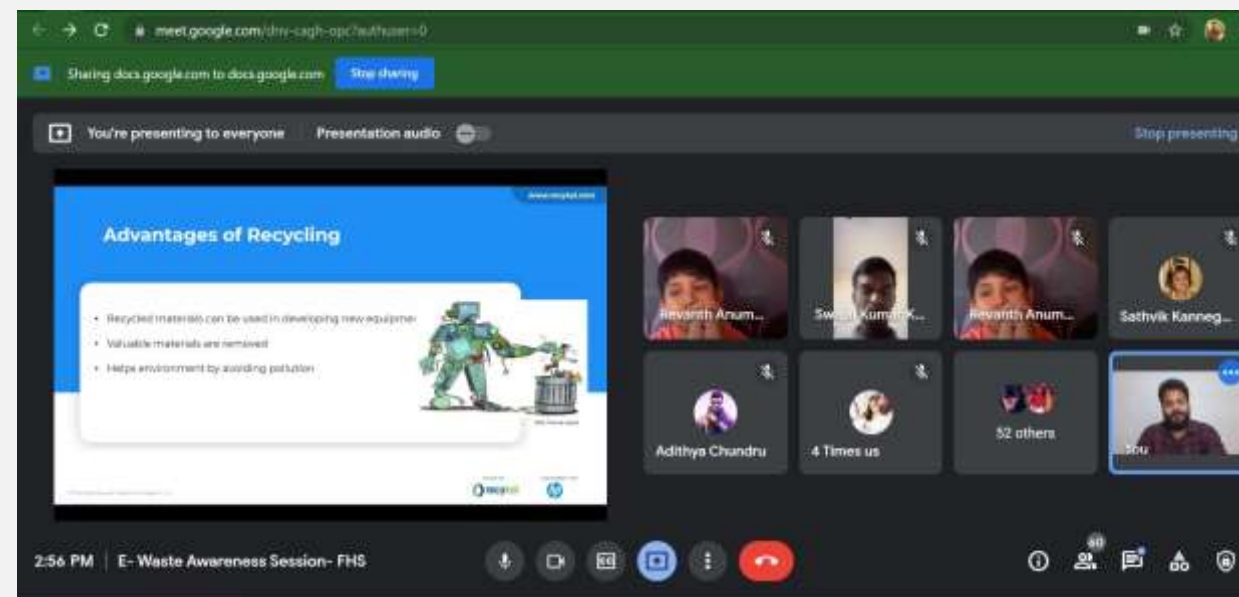

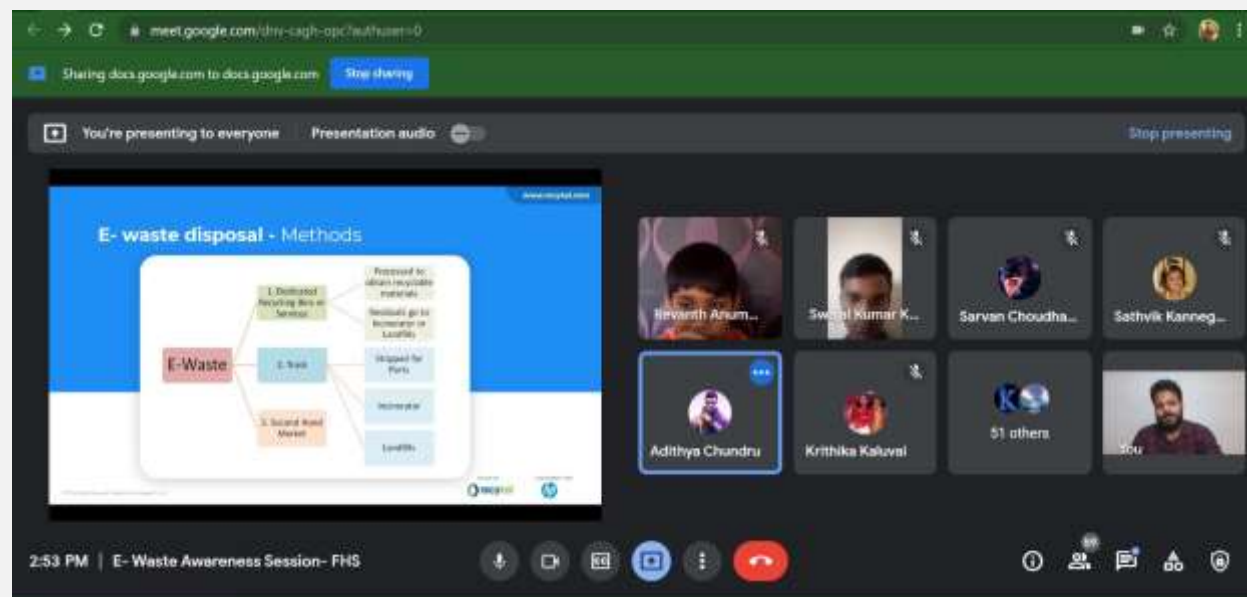

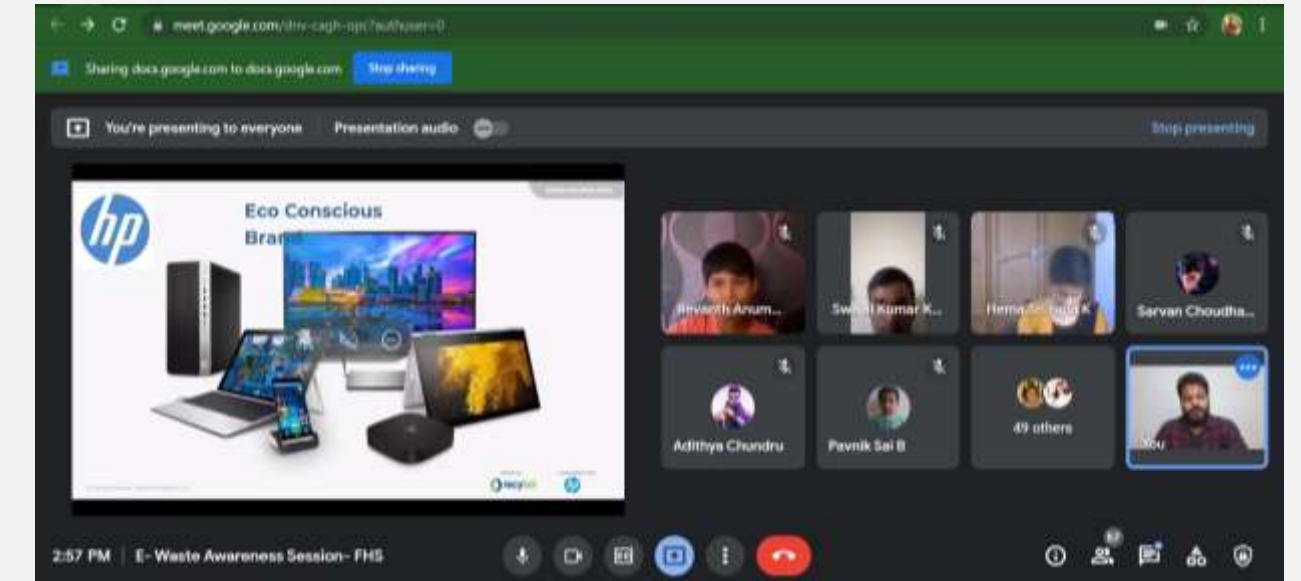

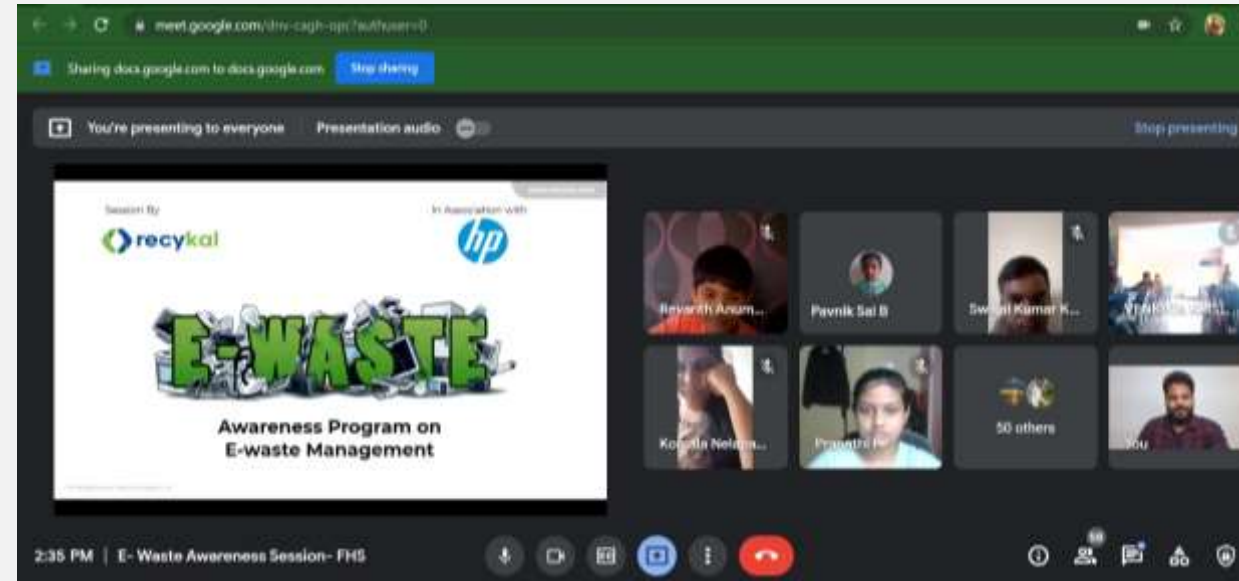

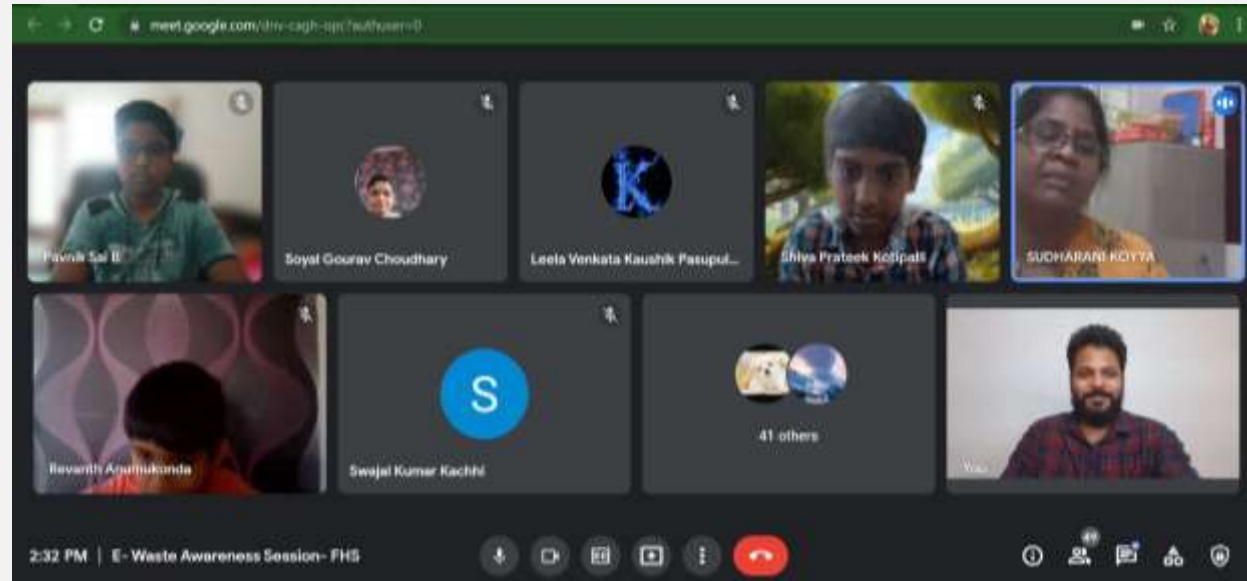

Key Takeaways

The students are extremely conscious regarding waste segregation and littering.

Children also know a lot more about plastics and how plastic waste can be managed in a sustainable manner.

A few students also shared their stories regarding Keeping seperate bins for e-waste and how their parents are teaching them about sustainable consumption.

Glimpses of the session:

Testimony

Sudha Rani Koyya

A school that focuses on promoting and educating their students on SDGs, it was a pleasure having Mr. Kamal from Recykal Team to create awareness on E-waste management. It was an informative and engaging session.

Thank you
Sudha Rani Koyya
Viceprincipal-FHGS

Hari Krishna Reddy

After learning about E-waste and why it is important to give it to the right recycler, I will definitely go back and ask my parents to have a separate bin for it.

Hari Krishna Reddy
Student- FHGS

Thank You
